

Street Tree Population Change 2005 - 2015

How to Read This Map
Each borough on this map is divided by census tracts, a geographic division used by the U.S. Census containing 1,200 - 8,000 people.
The tracts are shaded based on the percent change in stem count from the 2005-2006 to the 2015-2016 NYC Street Tree Censuses.

Percent Change in Stem Count per Census Tract

* indicates change within +/- 5%
