How to Read This Map

Each borough on this map is divided by census tracts, a geographic division used by the U.S. Census containing 1,200 - 8,000 people. The tracts are shaded based on the percent change in stem count from the 2005-2006 to the 2015-2016 NYC Street Tree Censuses.

Percent Change in Stem Count per Census Tract

- >100%
- 50% to 100%
- 6% to 49%
- no change*
- -6% to -49%
- -50% to -100%

* indicates change within +/- 5%
